Gadi Rapaport

Junior Software Developer | Certified Software Technician (DevOps)

Bnei Brak, Israel • dshrppury@gmail.com • GitHub • LinkedIn

PROFILE

Certified Software Technician specializing in DevOps, with hands-on experience building personal projects across backend development, Android apps, web interfaces and automation. Work includes Python, React, APIs, Git and CI/CD workflows. I use AI-assisted development tools while reviewing, testing and documenting the resulting code. Seeking a junior software, backend or full-stack development role.

EDUCATION & CERTIFICATION

2026 | Certified Software Technician, Software Engineering (DevOps specialization)
MAHAT (Israel Government Institute for Technological Training) and ORT Singalovski College, through the MEGO program. Diploma eligibility date: 26 July 2026.

WORK EXPERIENCE

2026 | Shafrir Romano Industries Ltd. | Operations & Administrative Support
Handled day-to-day administrative and operational tasks, worked with computer-based business processes, and coordinated requests in a fast-moving office environment.

SELECTED PROJECTS

Deadpool / DevMarshal | AI Development Agent Orchestration
Built a local system coordinating planning, implementation and code-review agents, with task tracking, Git integration, automated checks, failure recovery and human approval gates. Python, CLI tooling and CI workflows.

SHVAIL | Android Travel Planning App
Developed an Android app for organizing trips and itineraries with AI-assisted planning and offline-first data synchronization. Kotlin, Jetpack Compose, Firebase / Firestore and Cloud Functions.

Zugiut Krova | Client Website
Developed a responsive Hebrew website with right-to-left layouts and tailored UI components. React, Tailwind CSS and Cloudflare Workers.

Telegram Bots & Automation
Developed utilities for content management, user verification, notifications and file processing using Python, Telegram Bot API and API integrations.

TECHNICAL SKILLS

Development: Python, JavaScript / TypeScript, Kotlin, React, Flask / FastAPI, REST APIs, SQL
Tools & infrastructure: Git, GitHub Actions, Docker, Linux, Firebase, PostgreSQL, MySQL, Nginx
Workflow: Software testing, documentation, feature planning, AI-assisted development

LANGUAGES

Hebrew – Native | English – Good working proficiency
